[FreeShippingOn](#) is a new site dedicated to helping you find free shipping deals from popular sites. We found that they did have a rather wide selection of stores (500+) and they seemed to be popular shopping sites that we have actually heard of. Some sites include: Staples, Aeropostle, Avon, Best Buy, Apple, and Toshiba, as well as the standard oddball sites (Kimmyshop anyone?). As of right now, there doesn't seem to be many actual deals per store, the average only being between 3-4. But if you have a burning desire to spend money on something you didn't want until you saw it had free shipping - this is the site for you.
